## FOR IMMEDIATE RELEASE

**Boundless Connections**

### **She# Expands into the United States: Connecting Women in Technology**

*Boundless Connections is proud to announce that we have been chosen as the expansion partner for She# into the United States.*

**Olean, NY, January 2, 2019 (PR-US):** – In 2014, Dr. Mahsa Mohaghegh, PhD founded She# (pronounce “She Sharp”) with a clear mission: Invite more women into tech. 4 years and 26 events later she is expanding into The United States. Boundless Connections is proud to announce that we have been chosen as the expansion partner for She# and are thrilled to join this mission.

“I hope She# can bring about the much-needed change to the gender split in tech and believe that working together is the way to do this,” says Dr. Mahsa McCauley (Mohaghegh), Founder/Director She#, Lecturer AUT, NZ.

“We believe the only way forward is for men and women is to work together and learn from each other,” says Christina Lopez, founder and CEO at Boundless Connections, “She# events provide a catalyst for real progress in the tech sector and we are honored to bring this program to the US!”

The great part about this initiative is that it is open to everyone. Anyone interested in getting more women involved in the tech industry is welcome to join. The events are designed to show women how interactive and exciting the tech field is by using hands on activities with various professionals in the IT field. Through these events, participants will get a better idea of how rewarding and impactful a career in the tech industry can be. From artificial intelligence to cyber security, a career in computers has a direct impact on society and the future.

Boundless Connections will be partnering with various organizations, colleges, and businesses to set up regular She# meetings and events throughout each area as it expands its operations throughout the US over the next two years. It will also assist other locations in the US that are interested in developing a She# chapter in their area.

**About She#:** She# encourages women in Computer science, computer engineering, IT, and tech-related fields to develop academically and professionally, to network and learn with each other and to foster the advancement of women in high-school, university and industry. We host a range of events to help support women who are studying or are working in STEM related fields. More info: shesharp.us (United States intro site) – www.shesharp.co.nz

**About Boundless Connections:** The Boundless Connections Technology Center is an initiative making state of the art digital technology accessible for everyone. The tech center provides a focal point for young and old with various skill-sets and interests to collaborate and utilize the power of cutting-edge technology. The programs and events are designed to develop a technology pipeline and create a pathway for people to engage and solve local challenges with technology. These programs and events are tailored to various interest groups or demographics. More info: boundlessconnections.com
